

Power BI

# Interview Questions

1. What does the "Include" option in Power BI allow you to do?
  - A. Include data from external sources
  - B. Include specific data points in a visual
  - C. Include data only from the current month
  - D. Include data labels in a visual
  - **Answer: B. Include specific data points in a visual**
2. How can you exclude data from a visual in Power BI?
  - A. Use the Exclude option in the visual menu
  - B. Apply a filter to remove specific data
  - C. Set a limit on the data range
  - D. Export the visual and manually remove unwanted data
  - **Answer: B. Apply a filter to remove specific data**
3. What is the purpose of the "Export Data" feature in Power BI visuals?
  - A. Export the entire report
  - B. Export data from visuals to Excel or CSV
  - C. Export visuals as images
  - D. Export data to the Power BI service
  - **Answer: B. Export data from visuals to Excel or CSV**
4. In Power BI, what happens when you use the "Include" option on a specific data point in a visual?
  - A. The data point is highlighted
  - B. The data point is enlarged
  - C. The data point is duplicated
  - D. The data point is excluded from the visual
  - **Answer: A. The data point is highlighted**
5. Can you include or exclude data based on multiple criteria in a single visual?
  - A. Yes, always
  - B. No, it's not possible
  - C. Yes, with the use of advanced DAX expressions

- D. Yes, but only in certain visuals
- **Answer: A. Yes, always**

6. Which file formats are supported when exporting data from a visual in Power BI?

- A. Excel and PDF
- B. CSV and Excel
- C. PNG and JPEG
- D. JSON and XML
- **Answer: B. CSV and Excel**

7. How can you dynamically include or exclude data based on user interaction in a Power BI report?

- A. Use bookmarks
- B. Implement row-level security
- C. Create slicers and filters
- D. Utilize drillthrough actions
- **Answer: C. Create slicers and filters**

8. In Power BI, what role does the "Edit Interactions" feature play when including or excluding data?

- A. It allows real-time editing of visual content
- B. It controls the interaction between visuals
- C. It enables data validation before inclusion
- D. It adjusts the font and color of included data
- **Answer: B. It controls the interaction between visuals**

9. How can you export data from visuals in Power BI without including subtotals or totals?

- A. Use the "Exclude Totals" option
- B. Manually remove totals after export
- C. Apply a filter to exclude totals
- D. Export data only from specific visual elements
- **Answer: A. Use the "Exclude Totals" option**

10. When exporting data from a visual in Power BI, which file format preserves formulas and calculations?

- A. CSV
- B. Excel
- C. PDF
- D. JSON
- **Answer: B. Excel**

11. What happens if you choose to "Include" a data point that is already included in a visual in Power BI?

- A. The data point is duplicated
- B. The visual is cleared
- C. No change occurs
- D. The data point is excluded
- **Answer: C. No change occurs**

12. Which of the following actions can be performed with the "Exclude" option in Power BI?

- A. Exclude data points based on a DAX expression
- B. Exclude visuals from the report
- C. Exclude subtotals from export
- D. Exclude visuals from drillthrough actions
- **Answer: A. Exclude data points based on a DAX expression**

13. In Power BI, what is the purpose of the "Keep All" option when using the "Exclude" feature?

- A. Retain all data points and exclude selected
- B. Exclude all data points except the selected
- C. Keep only subtotals and totals
- D. Keep all data points in the visual
- **Answer: A. Retain all data points and exclude selected**

14. Can you include or exclude data based on measures in Power BI visuals?

- A. Yes, always

- B. No, it's not possible
- C. Yes, with the use of advanced DAX measures
- D. Yes, but only in certain visuals
- **Answer: C. Yes, with the use of advanced DAX measures**

15. What is the difference between "Include" and "Highlight" in Power BI visuals?

- A. They are synonymous
- B. "Include" retains data, "Highlight" emphasizes it
- C. "Highlight" retains data, "Include" emphasizes it
- D. They have no impact on the visual
- **Answer: B. "Include" retains data, "Highlight" emphasizes it**

16. How can you ensure that exported data from a visual reflects the current applied filters in Power BI?

- A. Use the "Include Filter Context" option
- B. Manually adjust the exported data
- C. Apply filters after exporting
- D. Export data only from visuals with no filters
- **Answer: A. Use the "Include Filter Context" option**

17. Can you include or exclude data based on a user's role in Power BI?

- A. Yes, always
- B. No, it's not possible
- C. Yes, with the use of row-level security
- D. Yes, but only in the Power BI service
- **Answer: C. Yes, with the use of row-level security**

18. What happens if you export data from a visual that has no data points included?

- A. The exported file is empty
- B. All data points are exported by default
- C. Only subtotals and totals are exported
- D. The export option is disabled

- **Answer: A. The exported file is empty**

19. What is the primary function of the "Keep Only" option when using the "Exclude" feature in Power BI?

- A. Retain selected data points and exclude others
- B. Exclude all data points except the selected
- C. Keep only subtotals and totals
- D. Keep all data points in the visual

- **Answer: A. Retain selected data points and exclude others**

20. In Power BI, how does the "Export Summary Data" option differ from regular data export?

- A. It exports only visuals without underlying data
- B. It exports a summary report with aggregated data
- C. It exports data in a compressed format
- D. It exports visuals in high-resolution images
- **Answer: B. It exports a summary report with aggregated data**
